

BURNISHED BLOCK COLOR PALETTE

 **AMCON**®

Since the mid-sixties, Amcon burnished masonry units have been used for all types of construction, offering exclusive benefits to the building's owner, designer, and contractors.

ONE-STEP INSTALLATION: Amcon burnished texture provides finished structural or non-structural walls in a single contractor, one-step operation. Amcon Concrete Products can offer significant savings in time and money.

NATURAL BEAUTY: Amcon burnished block provides naturally colored aggregates from different parts of the country. They offer a wide color range and long-life performance that you would expect from masonry.

DESIGN FLEXIBILITY: Amcon burnished block offer the designer flexibility through a variety of colors, scoring, chamfers, patterns, bullnose, and other special shapes.

WATER REPELLENT: Amcon burnished block are manufactured with integral water repellent (IWR+) admixture providing a wall that resists water absorption.

MAINTENANCE-FREE: Amcon burnished texture will last the lifetime of your building.
